### **DETAILED ACTION**

This action is a response to applicant's amendment filed February 18, 2004.

Applicant's arguments have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 1-3 and 12-15 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sulamanidze et al (European Patent Application 1,075,843). The Sulamanidze et al reference discloses various configurations of barbed sutures with predetermined patterns. However, the Alcamo reference suggests overlapping of the barbs in figure 8. It would have been obvious to provide Sulamanidze et al with overlapping or random distribution of the barbs along the suture to secure tissue that are not cut smoothly, but having jagged edges.

#### ***Allowable Subject Matter***

Claims 4-11 and 16-27 are allowable over the art of record.
